

Before John and Bonnie helped the Arop people create an alphabet, they didn't know how to read or write.

**Can you help decode the secret message?  
Use the decoder wheel to help you out!**

The Arop were the first language group that John and Bonnie helped develop an alphabet for, but they weren't the last. Now John and Bonnie are working with a team of people to translate the Bible into eleven different languages! This is called a cluster project. It's where languages that are similar work together to get the Bible translated even faster. More and more people are learning about Jesus. We love to see people read the Bible in their own language!

- Psalm 46:1 (NLT)

# DECODER WHEEL

1. Cut the circles out
2. Put it together with a brass fastener.
3. Turn the wheel to reveal the letter!

CUT OUT THESE TWO BIG CIRCLES
